

Wastewater and Industrial Discharge Actions

Priority Actions

Action 23: Control discharges of domestic wastes from boats within the Delta and its tributaries by more extensive enforcement of existing regulations.

Other Actions

Action 24: Reduce pollutant loadings to the Delta by treating a portion of upstream municipal wastewater effluent in wetlands.

Action 25: Reduce point source pollution through control of industrial and municipal wastewater discharges in a cost effective manner. Methods may include encouragement of pollutant credit trading.

Action 27: Reduce point source pollution through control of industrial and municipal wastewater discharges. Methods may include incentives for reclamation and reuse.
